

TECHNICAL DATA SHEET

KN95 Protective Face Mask

Product Code: K-01

Name	KN95 Protective Face Mask
Material	Nonwovens
Filtration Efficiency	≥95% Standard: GB 2626-2006
Grammage	50+50+50+30/m2 (4 Ply Face Mask)
Product Size	235 x 120 mm (For Adults)

Characteristic	Specification
Materials	Mask
	4 Ply
	Outer Layer: Spunbond Polypropylene
	2nd Layer : ES
	3rd Layer : Meltblown Polypropylene
	Earloop
	Inner Layer: Spunbond Polypropylene
	Nose Piece
	Polyester Spandex
	Bendable Plastic

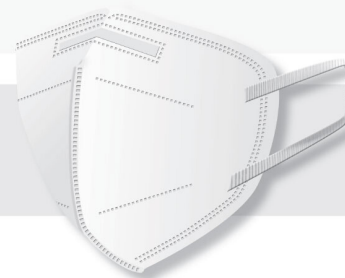

Color	White
--------------	--------------

Application	Clean room, Food Processing, Lab, Work Place, Etc
--------------------	--

Description & Features	The disposable KN95 mask is intended to filter out 95% of NaCl particles with a mass median diameter of 0.6 micrometers. Therefore, the mask can keep you safe from air pollution, dust, odors, pollen, smog, etc. It features a four layer filtration barrier. The high-quality elastic loops allows the mask to be easy to wear/take off, harder to slip and flexible with faces of different shapes.
-----------------------------------	---

Packing	Mask / Box:	10 Mask
	Box / Case:	30 Boxes (300 Pieces)

Storage Condition	<ul style="list-style-type: none"> * Store under cool, clean & dry condition. * Avoid excessive heat (over 40°C or 104°F)
